Contemporary & Innovative

Sonneman is synonymous with forward-thinking design, where form and function exist in perfect balance. Rooted in architectural principles, each fixture is created to enhance space through clean lines, refined materials, and advanced lighting technology. From sculptural pendants to streamlined architectural systems, Sonneman lighting brings clarity, warmth, and intention to contemporary interiors.

Our collections embody design-driven innovation — modular, scalable systems that integrate seamlessly into the built environment.

From iconic families like Suspenders and Constellation to new architectural solutions, Sonneman creates lighting that adapts as easily as it inspires.

Each product is engineered for longevity, evolving with spaces while staying timelessly relevant. Sonneman's work has long stood at the intersection of innovation and aesthetics—and now, it's available through HVLG.
